Maya R. Patel

Machine Learning & Data Engineer | Responsible AI, Document Intelligence, Data Platforms | UT Austin CS

Austin, Texas, United States

About

I build machine-learning systems that are useful, measurable, and reliable after they leave a notebook. My experience spans document intelligence, responsible AI evaluation, forecasting, data pipelines, and internal tools used by operations teams.

At Bluebonnet Health Analytics, I developed an OCR and classification service that processed more than 65,000 pages each week and reduced median processing latency from 9.4 seconds to 3.1 seconds. In the UT Austin Responsible AI Laboratory, I evaluate fairness and calibration for language-model classifiers and help maintain reproducible experiments across shared computing infrastructure.

I am graduating from The University of Texas at Austin in May 2026 with a B.S. in Computer Science and a minor in Applied Statistics. I am especially interested in entry-level machine learning engineering, data engineering, and applied AI roles where I can combine strong software practices with careful model evaluation.

Experience

Bluebonnet Health Analytics

Machine Learning Engineering Intern

May 2025 - August 2025 (4 months)

Austin, Texas, United States

Built production-facing document intelligence tools for clinical operations. Developed a PyTorch classifier covering 18 referral categories and improved macro F1 from 0.71 to 0.86 through class-balanced training, label review, and structured error analysis. Designed an asynchronous OCR and inference service with FastAPI, Celery, Redis, and Docker that handled 65,000+ pages per week and lowered median latency to 3.1 seconds. Added feature-drift monitoring and worked with compliance and product teams to define human-review thresholds for a staged pilot used by 42 specialists.

UT Austin Responsible AI Laboratory

Undergraduate Research Assistant

January 2024 - May 2026 (2 years 5 months)

Austin, Texas, United States

Evaluate fairness, calibration, and abstention behavior for large-language-model classifiers on 120,000 public benefits questions. Built reproducible Python and Hugging Face experiments on Slurm, reduced benchmark runtime by 38%, and contributed to a student-track paper accepted at ACM FAccT 2025. Mentor new researchers on statistical testing, Git workflows, and responsible handling of sensitive attributes.

CivicSignal Labs
Data Engineering Intern
September 2024 - December 2024 (4 months)

Remote

Created Airflow and dbt pipelines combining transit, weather, and service-alert feeds in BigQuery. Increased successful daily loads from 91% to 99.6%, added quality and freshness tests for 34 production tables, and built a PostGIS aggregation API with p95 response times below 180 milliseconds.

The University of Texas at Austin
Teaching Assistant - Elements of Data Science
August 2024 - May 2026 (1 year 10 months)

Austin, Texas, United States

Lead two weekly lab sections for 58 students covering pandas, visualization, hypothesis testing, regression, and reproducible notebooks. Created autograded assignments and debugging guides, held office hours, and earned a median student evaluation of 4.8 out of 5.

Women in Computing at UT Austin
Data Science Lead
May 2024 - May 2025 (1 year 1 month)

Austin, Texas, United States

Organized six technical workshops for 180+ attendees, coordinated volunteer instructors, and led a five-person analytics team. Our participation analysis informed changes to the mentorship program that increased returning-member engagement by 21%.

Education

The University of Texas at Austin
Bachelor of Science - Computer Science; Minor in Applied Statistics
August 2022 - May 2026

Austin, Texas, United States

GPA: 3.82/4.00. University Honors for six semesters and member of the CNS Dean's Scholars Program. Coursework includes machine learning, data mining, distributed systems, databases, probability, natural language processing, cloud computing, and software engineering.

Projects

PaperTrail - Document Intelligence Platform
Project Lead and Full-Stack ML Engineer
August 2025 - December 2025

Created a multi-stage invoice and receipt extraction platform using OpenCV, transformers, PostgreSQL, AWS SQS and Lambda, and Next.js. Achieved 93.4% exact-match accuracy on 1,800 held-out documents and built a confidence-based review interface that reduced manual correction time by 46%.

MetroPulse - Transit Delay Forecasting
Machine Learning Engineer
January 2025 - April 2025

Trained LightGBM models on 14 million vehicle observations and reduced mean absolute error by 22% compared with schedule-only baselines. Deployed a FastAPI service and React map used in a 600-person campus pilot.

PantryCast - Food Pantry Demand Planner

Data Scientist
February 2024 - May 2024

Forecasted demand for 23 food categories using distribution history, holidays, weather, and academic-calendar signals. Delivered a Streamlit planning tool and documented retraining process to a local nonprofit.

Volunteer Experience

Central Texas Food Access Network
Data Volunteer
September 2023 - Present

Austin, Texas, United States

Clean monthly distribution records, maintain a lightweight dashboard for volunteer coordinators, and help document data definitions for partner pantries.

Licenses & Certifications

Amazon Web Services
AWS Certified Cloud Practitioner
Issued November 2025

Databricks
Lakehouse Fundamentals
Issued July 2025

DeepLearning.AI
Machine Learning in Production
Issued March 2025

Honors & Awards

HackTX 2024
Best Use of Public Data
October 2024

Recognized for a heat-risk resource-mapping application that combined public shade, cooling-center, transit, and temperature data.

College of Natural Sciences
University Honors
Fall 2022 - Spring 2025

Courses

Machine Learning • Data Mining • Distributed Systems • Database Management • Natural Language Processing • Probability • Cloud Computing • Software Engineering

Skills

Python • SQL • PyTorch • Machine Learning • Data Engineering • Airflow • dbt • FastAPI • AWS • PostgreSQL • Docker • Responsible AI • Model Evaluation • Experiment Design
