EDUCATION

Vishwakarma Institute of Technology — Pune, India
Bachelor of Technology, Electronics and Computer Engineering — Aug. 2023 - May 2027

CGPA: 8.62/10 | **Expected Graduation:** May 2027
Relevant Coursework: Data Structures, Object-Oriented Programming, Database Systems, Computer Networks, Operating Systems, Cloud Computing, Embedded Systems, Probability and Statistics

PROFESSIONAL EXPERIENCE

Backend Engineering Intern — Pune, India
CloudKite Labs — May 2026 - Jul. 2026

- Developed Node.js and Express APIs for a small-business inventory platform, adding validation, pagination, and PostgreSQL indexes that reduced p95 response time from **620 ms to 240 ms**.
- Implemented Redis caching for product and dashboard queries, decreasing repeated database reads by **37%** during load tests at 150 concurrent users.
- Wrote Jest integration tests and GitHub Actions checks for 26 endpoints, increasing backend test coverage from **41% to 78%**.
- Investigated production logs and fixed duplicate-order creation by adding idempotency keys and database constraints, eliminating the recurring support issue.

Student Developer — Pune, India
VIT Pune Smart Campus Lab — Aug. 2025 - Apr. 2026

- Built a Django REST service for classroom occupancy and maintenance reports, integrating QR-code check-ins and role-based access for **1,200+ student users**.
- Designed PostgreSQL tables and background jobs for report assignments, reminders, and status history; reduced unresolved duplicate tickets by **29%**.
- Created Grafana dashboards for API errors, request latency, and queue depth, helping the team diagnose two deployment regressions during pilot testing.
- Collaborated with three student developers using issue templates, pull-request reviews, and weekly demos to campus facilities staff.

Open-Source Contributor — Remote
Code for Communities India — Jan. 2025 - Dec. 2025

- Contributed accessibility fixes, form validation, and CSV export features to a volunteer-management web application used by six nonprofit chapters.
- Resolved 11 issues across React, TypeScript, and Python repositories and improved contributor setup documentation for Windows and Linux users.

SELECTED PROJECTS

CampusQueue - Appointment and Token System | *Java, Spring Boot, PostgreSQL, React, Docker* — Jan. 2026 - Apr. 2026

- Built a role-based appointment and virtual-token platform for university offices with live queue position, estimated wait time, and staff capacity controls.
- Added optimistic locking and transactional updates to prevent duplicate token assignments during concurrency tests with **200 simultaneous requests**.
- Containerized the application and created a CI workflow for unit tests, static checks, and deployment to a small cloud virtual machine.

ADDITIONAL PROJECTS

InvoiceLens - Receipt and Invoice Extractor | *Python, FastAPI, OpenCV, Tesseract, SQLite* Sep. 2025 - Dec. 2025

- Created an OCR API that extracted vendor, invoice number, date, tax, and total from scanned documents, reaching **88% field accuracy** on a 450-image test set.
- Added blur, brightness, and rotation checks to reject low-quality uploads before OCR and return actionable feedback to users.
- Implemented normalization rules, confidence thresholds, and a correction screen that stored verified values for future evaluation.

WattWatch - IoT Energy Monitor | *ESP32, C++, MQTT, Node.js, InfluxDB, Grafana* Feb. 2025 - May 2025

- Programmed an ESP32 prototype to publish voltage, current, and estimated power usage over MQTT every five seconds.
- Built a Node.js ingestion service with buffering and reconnect logic, maintaining **99.2% message delivery** during a 72-hour test.
- Designed Grafana dashboards and threshold alerts for unusual consumption; documented calibration limitations and electrical-safety precautions.

ApplyTrack - Internship Application Manager | *TypeScript, Next.js, Supabase, Tailwind CSS* Jun. 2025 - Aug. 2025

- Developed a responsive job-application tracker with status history, reminders, notes, and CSV import/export for student users.
- Implemented Supabase authentication and row-level security policies so users could access only their own records.
- Ran usability sessions with 12 classmates and simplified the add-application flow from nine fields to five required fields.

LEADERSHIP, RESEARCH & ACTIVITIES

Technical Coordinator Pune, India
VIT Pune Developers Club Jul. 2025 - Present

- Plan beginner workshops on Git, APIs, and SQL; delivered four sessions for 140+ students with hands-on exercises and starter repositories.
- Coordinate a peer project-review program and match student teams with volunteer reviewers for architecture, testing, and deployment feedback.

Volunteer Mentor Pune, India
Pune School Coding Initiative Oct. 2024 - Mar. 2026

- Taught introductory Python and problem-solving to secondary-school students twice per month and created bilingual worksheets in English and Hindi.
- Helped 18 students complete small calculator, quiz, and text-adventure projects during a six-week summer program.

CERTIFICATIONS & RECOGNITION

• **Google Cloud Computing Foundations** - Google Cloud Skills Boost, issued Apr. 2026
• **Postman API Fundamentals Student Expert** - Postman, issued Nov. 2025
• **Smart India Hackathon Internal Round Finalist** - VIT Pune, Sep. 2025

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, C++, SQL, Bash
Backend & Web: Spring Boot, Node.js, Express, Django REST Framework, FastAPI, React, Next.js, REST APIs
Databases & Tools: PostgreSQL, MySQL, SQLite, Supabase, Redis, Git, GitHub Actions, Docker, Linux, Postman
Cloud & Observability: Google Cloud fundamentals, basic AWS, Grafana, InfluxDB, structured logging, API monitoring
Hardware & Protocols: ESP32, MQTT, basic embedded C++, serial communication

ADDITIONAL INFORMATION

Languages: English (professional), Hindi (native), Marathi (conversational)
Availability: Seeking software engineering internships for December 2026 onward and graduate roles beginning mid-2027
Interests: Backend systems, developer tools, cloud infrastructure, cricket analytics, electronics projects
