Elena Morales

Product Analytics & Software Student | Experimentation, Data Products, Responsible AI | UIUC

Chicago, Illinois, United States

Summary

I work at the intersection of product analytics, software engineering, and responsible data use. My projects and internships have involved experiment design, metric governance, self-service data tools, and user-facing applications for education and public services. I am especially interested in making analytics systems understandable: clearly defined metrics, visible assumptions, reproducible analysis, and interfaces that help teams act on evidence. I am completing a combined information sciences and computer science degree at UIUC and seeking product analytics, data product, or software roles for 2027.

Experience

Northstar Learning

Product Analytics Intern

May 2026 - August 2026

Chicago, IL

Defined activation, engagement, and retention metrics for a learning platform serving 95,000 monthly users and reconciled event definitions across product and finance reports. Built SQL models and Amplitude dashboards for onboarding experiments, content discovery, and educator workflows, reducing ad hoc analysis requests by 34%. Analyzed a randomized checklist experiment and identified a 6.8% lift in first-week course completion with no increase in support contacts. Created a metric-change review template that documented owners, exclusions, backfill rules, and expected downstream impact.

CivicLayer Studio

Software Engineering Intern

September 2025 - December 2025

Remote

Developed a multilingual React and Django application that helped residents screen for 18 local assistance programs and prepare required documents. Improved form completion by 21% through progressive disclosure, saved progress, and field-level validation informed by usability sessions. Added audit logs and role-based access controls for nonprofit case workers handling sensitive application data.

Focus Areas

Production systems

Testing and quality

Clear documentation

Measurable outcomes

Experience

UIUC iSchool

Peer Learning Assistant - Data Storytelling

January 2025 - Present

Champaign, IL

Facilitated workshops on chart selection, uncertainty, accessible color use, annotation, and communicating limitations. Reviewed 120 student projects and created reusable examples for misleading axes, aggregation bias, and unsupported causal claims.

Projects

Experiment Registry and Guardrail Monitor

Python, FastAPI, PostgreSQL, React, Statsmodels

January 2026 - May 2026

Built a registry for hypotheses, assignment logic, primary metrics, guardrails, analysis plans, and decision notes across simulated product experiments. Automated sample-ratio mismatch checks, sequential peeking warnings, and segment-balance summaries before results were unlocked. Generated plain-language result cards with effect sizes, intervals, power limitations, and links to reproducible notebooks.

Privacy Budget Explorer

TypeScript, Next.js, Python, Differential Privacy

September 2025 - December 2025

Created an educational interface showing how epsilon, query count, clipping, and cohort size affect accuracy and privacy tradeoffs. Implemented simulated noisy counts and confidence ranges for 12 common public-data queries.

Public Benefits Access Map

Django, PostGIS, React, Mapbox

March 2025 - August 2025

Mapped service locations, eligibility information, transit access, language support, and appointment requirements for four Chicago neighborhoods. Added mobile-first filters and printable summaries after interviews with community navigators.

Metric Definition Linter

Python, SQLGlot, YAML, GitHub Actions

November 2024 - February 2025

Validated analytics metric files for missing owners, inconsistent grains, unbounded joins, and undocumented filters. Produced pull-request comments with suggested fixes and examples from an approved metric catalog.

Synthetic QA LinkedIn-style profile - all details fictional

Education

University of Illinois Urbana-Champaign

Bachelor of Science - BS, Information Sciences + Computer Science

Credentials

Amplitude Product Analytics Certification - 2026

Google Data Analytics Professional Certificate - 2025

Honors

Siebel Center for Design Student Grant, 2026

Dean's List, five semesters

Profile Note

This is a synthetic profile created for document-processing and token-tuning QA.

Education

University of Illinois Urbana-Champaign
Bachelor of Science - BS, Information Sciences + Computer Science
August 2023 - December 2026

Relevant coursework: Data Structures, Database Design, Product Analytics, Human-Computer Interaction, Machine Learning, Privacy, Software Engineering, Causal Inference

---

Licenses & Certifications

Amplitude Product Analytics Certification - 2026
Issued for skills validation in this synthetic QA profile.

Google Data Analytics Professional Certificate - 2025
Issued for skills validation in this synthetic QA profile.

Volunteer Experience

Design for America
Design for America - analytics lead for a student team researching barriers to municipal-service access.

Latinas in Tech campus chapter
Latinas in Tech campus chapter - organized portfolio reviews and alumni panels for 90 attendees.

Illinois Data Science Club
Illinois Data Science Club - led workshops on product funnels, experimentation, and metric design.

Skills

Analytics
SQL, Python, R, causal inference, experimentation, funnel analysis, cohort analysis

Data Tools
dbt, BigQuery, PostgreSQL, Amplitude, Mixpanel, Tableau, Looker Studio

Software
TypeScript, React, Next.js, Django, FastAPI, REST APIs

Research & Design
Usability testing, survey design, accessibility, data storytelling, metric governance

Workflow
Git, GitHub Actions, Docker, Jupyter, Notion, Figma
