# Arjun Mehta

Electronics & Computer Engineering Student | Backend Development, Java, Node.js, Cloud Fundamentals

Pune, Maharashtra, India

## About

I am a third-year Electronics and Computer Engineering student at Vishwakarma Institute of Technology in Pune. I enjoy building backend services, database-driven web applications, and small connected-device projects that solve practical campus or student problems.

During my internship at CloudKite Labs, I worked on Node.js APIs for an inventory platform, improved PostgreSQL query performance, added Redis caching, and expanded automated test coverage. In the VIT Pune Smart Campus Lab, I helped build a maintenance-reporting service used by more than 1,200 students and learned how logging, dashboards, and careful database constraints improve reliability.

I am currently strengthening my Java, Spring Boot, cloud, and system-design skills. I am looking for software engineering internships from December 2026 onward and graduate opportunities beginning in 2027.

## Experience

**CloudKite Labs**
Backend Engineering Intern
May 2026 - July 2026 (3 months)
Pune, Maharashtra, India

Developed Node.js and Express endpoints for a small-business inventory product. Added validation, pagination, PostgreSQL indexes, Redis caching, and integration tests. Reduced p95 API response time from 620 milliseconds to 240 milliseconds and helped resolve duplicate order creation by introducing idempotency keys and database constraints.

**VIT Pune Smart Campus Lab**
Student Developer
August 2025 - April 2026 (9 months)
Pune, Maharashtra, India

Built a Django REST service for classroom occupancy and maintenance reports with QR-code check-ins and role-based access. Designed PostgreSQL tables, reminder jobs, and status history for 1,200+ student users. Created Grafana dashboards for errors, latency, and queue depth and worked in a four-person student development team.

**Code for Communities India**
Open-Source Contributor
January 2025 - December 2025 (1 year)
Remote

Contributed accessibility improvements, form validation, CSV export, and setup documentation to a volunteer-management application. Resolved 11 issues in React, TypeScript, and Python repositories.

## Education

**Vishwakarma Institute of Technology**
Bachelor of Technology - Electronics and Computer Engineering
August 2023 - May 2027

Pune, Maharashtra, India

CGPA: 8.62/10. Coursework includes data structures, object-oriented programming, database systems, computer networks, operating systems, cloud computing, embedded systems, and probability.

## Projects

**CampusQueue**
Backend and Full-Stack Developer
January 2026 - April 2026

Built a Spring Boot and React appointment and virtual-token system for university offices. Added optimistic locking and transactional updates to avoid duplicate tokens in concurrency tests with 200 simultaneous requests.

**InvoiceLens**
Python Developer
September 2025 - December 2025

Created a FastAPI and OpenCV OCR service for invoice fields. Added image-quality checks, confidence thresholds, data normalization, and a correction interface. Reached 88% field accuracy on a 450-image test set.

**WattWatch**
IoT Project Developer
February 2025 - May 2025

Programmed an ESP32 energy-monitoring prototype using C++ and MQTT. Built a Node.js ingestion service and Grafana dashboards, reaching 99.2% message delivery during a 72-hour test.

**ApplyTrack**
Full-Stack Developer
June 2025 - August 2025

Developed a Next.js and Supabase internship application tracker with reminders, notes, history, CSV import and export, authentication, and row-level security.

## Volunteer Experience

**VIT Pune Developers Club**
Technical Coordinator
July 2025 - Present

Pune, Maharashtra, India

Plan beginner workshops on Git, REST APIs, SQL, and deployment. Delivered four hands-on sessions for more than 140 students, maintain starter repositories, and coordinate a peer project-review program that connects student teams with volunteer reviewers.

**Pune School Coding Initiative**
Volunteer Mentor
October 2024 - March 2026

Pune, Maharashtra, India

Taught introductory Python and problem solving to secondary-school students twice each month. Created bilingual English-Hindi worksheets and helped 18 students complete calculator, quiz, and text-adventure projects during a six-week summer program.

## Licenses & Certifications

**Google Cloud Skills Boost**
Google Cloud Computing Foundations
Issued April 2026

Completed foundational labs covering compute, storage, networking, identity, monitoring, and cloud security concepts.

**Postman**
API Fundamentals Student Expert
Issued November 2025

Completed a student training path on REST concepts, collections, environments, automated tests, and API documentation.

**Cisco Networking Academy**
Introduction to Networks
Issued August 2025

Studied addressing, switching, routing fundamentals, common application protocols, and basic troubleshooting.

## Honors & Awards

**VIT Pune**
Smart India Hackathon Internal Round Finalist
September 2025

Selected as one of 12 campus finalist teams for a maintenance and resource-allocation prototype.

**VIT Pune Developers Club**
Outstanding Peer Mentor
April 2026

Recognized for consistent project reviews, workshop support, and onboarding help for first-year members.

## Courses

Data Structures • Object-Oriented Programming • Database Systems • Computer Networks • Operating Systems • Cloud Computing • Embedded Systems

## Skills

Java • Python • JavaScript • TypeScript • Spring Boot • Node.js • Express • Django REST Framework • PostgreSQL • Redis • Docker • GitHub Actions • REST APIs • ESP32 • MQTT
